

Health & Safety Assessments

Our engineers are responsible for fulfilling all **valid regulations** regarding **occupational health and safety**

For this purpose, we prepare a health and safety assessment regarding the work to be carried out for a specific client. Upon request, we also take care of the

coordination of health and safety issues

and thus guarantee that all necessary measures are taken to avoid accidents of any kind while the work is being carried out.

Our engineers will be responsible for the adequateness of any such measures, and will oblige the workers on site to fulfill all given requirements in order to avoid accidents. All health and safety assessments are **approved** by the corresponding **official engineering associations**.

Our **licensed engineers** have ample experience with the following types of health and safety assessments:

- **High and medium voltage electrical installations.**

- Plumbing and sanitation.
- Telecommunications.
- Fire safety.
- Air conditioning and forced ventilation.
- Domotics.
- Renewable energies: wind power, thermal solar energy and photovoltaics.
- Other.
